

# LandMentor Free Virtual Viewer

**LandMentor** is a new core technology to replace CAD for land development design, surveying, mapping and (in the near future) engineering. The free **LandMentor** Virtual Viewer allows you to experience the future of how land development will be communicated.

Two dimensional plans of the past are difficult (if not impossible) to correctly visualize what is represented on paper, and today's 3D renderings are simply far too costly to be practical. To make a bad situation worse, existing CAD solutions cannot provide critical site design information.

**LandMentor** reigns in a new era where 3D massing and exact surface (parcel) information is an effortless button press from a significantly reduced work flow (compared to CAD solutions). The patent pending user interface eliminates all commands while reducing effort and learning curves.

The Virtual Viewer utilizes *Video Gaming* technology allowing Cities, Developers, Builders, Consultants, and Students to *experience* development proposals and as-built surveying in a virtual setting without the costs, or long learning curves of CAD.

Virtual communication of land development will forever *eliminate guesswork* as to what a development will eventually look like. When used for *as-built* land surveying the Virtual Viewer provides another layer of protection against costly mistakes made from miss-interpreting field work. **LandMentor** is a precision land surveying system using positional coordinate geometry (an industry first), thus most common CAD induced surveying errors are eliminated!

To experience the future of Virtualization and the precision Site Analysis capability of the Virtual Viewer download the software at:

[http://www.rhsdplanning.com/LM\\_VIEWER7.6-setup.exe](http://www.rhsdplanning.com/LM_VIEWER7.6-setup.exe)

This technology is designed to be quickly learned and mastered. To download the instructions:

[http://www.rhsdplanning.com/LM\\_VIEWER\\_Instructions.pdf](http://www.rhsdplanning.com/LM_VIEWER_Instructions.pdf)

Example Files:

[http://www.rhsdplanning.com/ExampleCommercial\\_Virtual.ppf](http://www.rhsdplanning.com/ExampleCommercial_Virtual.ppf)

[http://www.rhsdplanning.com/HuntersLakeC\\_3D\\_1a.ppf](http://www.rhsdplanning.com/HuntersLakeC_3D_1a.ppf)

[http://www.rhsdplanning.com/RiverPRairie\\_3D.ppf](http://www.rhsdplanning.com/RiverPRairie_3D.ppf)

Note: If the download compresses the file, you may have to specify the correct uncompressed extension for **LandMentor** which is .ppf

**LandMentor** will be available Spring/Summer 2013 beta pre-release may be available from Neighborhood Innovations, LLC to a select few interested customers. For more information call 763-545-0216 or contact Rick Harrison at [rharrison@neighborhoodinnovations.com](mailto:rharrison@neighborhoodinnovations.com)
